

Rolling Green Nursery

Peonies

subject to availability

Each summer we pick a collection of herbaceous peonies from several growers and pot them up in the fall. We strive to have some new and unusual varieties as well as a selection of the tried and true. Plant in full sun. So far the deer have not developed a taste for peonies.

TREE PEONY deciduous shrub, 5-7" flowers, blooms early spring before herbaceous peonies, on last year's stems.

SINGLE single row of flowers with a center of stamens, graceful and less incline to lie down.

JAPANESE have a double row of petals with a center of enlarged stamens.

DOUBLE and SEMI-DOUBLE rounded flowers in which all or most of the stamens have turned into petals. These old fashioned classics are loved for their hardiness and large flowers.

ITOH or Intersectional peony crosses of tree peony and herbaceous peony.

YELLOW

X Itoh Bartzella 30-36", double, yellow, fragrant, mid-late, Z4.
